WHY CONSIDER AMERICAN FORCE PRIVATE SECURITY

Threats to companies today are increasingly complex and intense at a time when business operations are becoming more interrelated. Investment in security can help significantly reduce a company's vulnerability to many factors that threaten performance, facilities, employees, and the key management personnel.

Manned security is probably the only true effective form of reducing vandalism, theft and criminal damages to property and aggressive behavior towards staff and service users. AFPS was established specifically to meet this demand by providing a professional, pro-active and consultative security service to businesses seeking security solutions that can be relied upon.

At AFPS we provide a comprehensive spectrum of manned security services as well as local quality management. From one man guarding, to a multi-manned security team.

AFPS offers you the choice to support your current in-house team or to provide a full security management for your facility.

At AFPS, we believe effective and professional management is critical to a successful security company client relationship.

By being attentive to the needs of our clients and maintaining an open line of communications with the client, we strive to maintain that excellence. Anything less is not acceptable.
